

## Zomato Onboarding Research Plan

This project will be overseeing the Restaurant Analysis where we find out information about

- What restaurants are popular?
- What restaurants generate the highest revenue?
- Which orders are highest?
- What makes these restaurants popular across the country?

### Dashboard

I will be using Power BI to present my findings, which will consist of

- Bar and Line Charts
- KPI Cards
- Tables

that will break down results for each question. The process will also include data cleaning before creating these charts which will make charts easier to read. Analysis of findings will be given for each visualization.

### Dashboard Recommendations

- Will present recommendations based on these findings calculated in results
